## Overview

The purpose of this document is to show you what you can expect should you choose to invest in *Future Armada: Talon*. The images on the next couple of pages are low-resolution thumbnails meant to provide a general idea of what is inside each book.

Specifically, this is what you're looking at:

- **Page 3:** Main Book. Brief descriptions are given for each area of the vessel, and composite maps are provided so it is easy to put the pieces together. The Open Game License is utilized to present stat blocks familiar to players of the futuristic version of the world's most popular role playing game. Note that these are the same mechanics as have always been found in *Future Armada*. Only the license, logo, and legal details have changed.
- A document is provided for *Talon*, and a bonus document for the *Wyvern* sample bounty.
- **Page 4 (left side):** Color Maps. The map book provides tactical maps (1 inch = 5 ft.) for the interior areas of the ship. The pages are designed to be printed out and laid edge to edge. Additional pages (not shown) are provided to create a cargo variant.
- **Page 4 (right side):** Printer Friendly Maps. A grayscale version of the color map book is provided. The right side of the image shows the same pages from that book.
- **Page 5:** Sample Map. This is a single page from the color map book, ready to be printed out and used with miniatures. The maps are designed to be laid end-to-end as needed. This particular page is the lower section of the bridge (the pilot's roost is above) with some escape pods and cold sleep berths just aft.
- **Page 6:** Bonus Art. Two of the rendered 3D exterior views are shown. The actual pictures are 800x600 jpeg images. This product also includes a poster-size jpeg of the entire ship at 1 inch = 5ft scale.
- **Page 7:** Add copy from the sales web page.

Thank you for taking the time to explore this product line. I hope that *Talon*, and all of *Future Armada* can be of service to you and your campaign.

## TALON

*Bounty Hunter*

Mordechai Hawke is a ruthless bounty hunter known throughout the border worlds. His ship, called “Talon”, is a surplus Lelantos-class search and destroy vessel which has been upgraded with cutting edge technology. The ship’s registered name is “Lex Talionis” - Latin for the Law of Revenge. This is the ancient source of the “eye for an eye” concept of justice – something Mordechai has embraced fully.

The Lelantos-class was developed early in the war to fill a variety of roles. With an fair sized bay, it could easily carry a small craft, troops, and supplies. It was also well armed and armored, and was exceptionally maneuverable both in space and atmosphere. With a pair of Serena-class fighters in the bay this class of ship proved very effective at long range search-and-destroy operations. By the end of the war, this was the official military classification for the Lelantos.

In the post-war era, the design has been adopted for non-military use as a general cargo transport. The unmodified bay is designed to hold and secure two standard HMT-337 cargo containers side by side. With the entire lower deck cleared out for maximum cargo space, four more can be carried. This is another mid-sized ship designed to support a group of players in a variety of campaigns and maps are provided for both the prisoner transport and cargo versions. As a sample bounty, the "Wyvern" is also included in it's own complete document. This is a Valkyrn interceptor turned into a bio-organic alien hybrid.
