## Overview

The purpose of this document is to show you what you can expect should you choose to invest in this product. The images on the following two pages are low-resolution “print preview” screen captures meant to provide a general idea of what is inside the book.

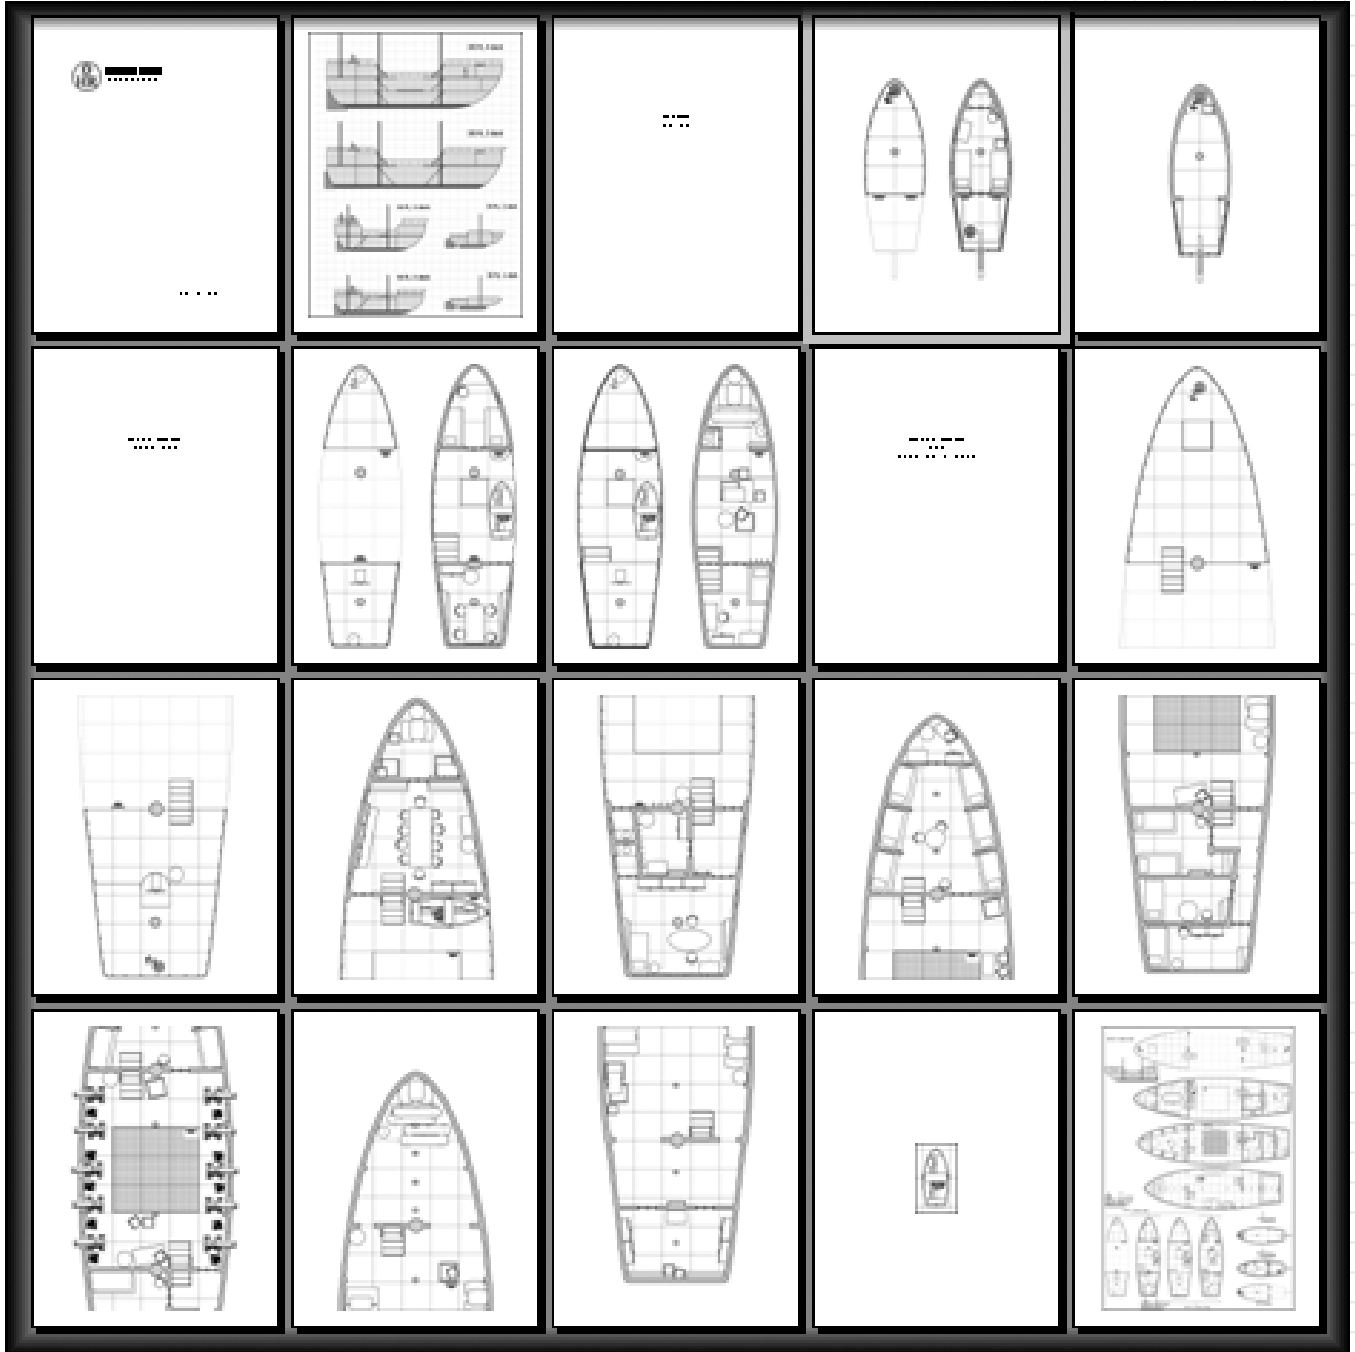

Specifically, this is what you’re looking at:

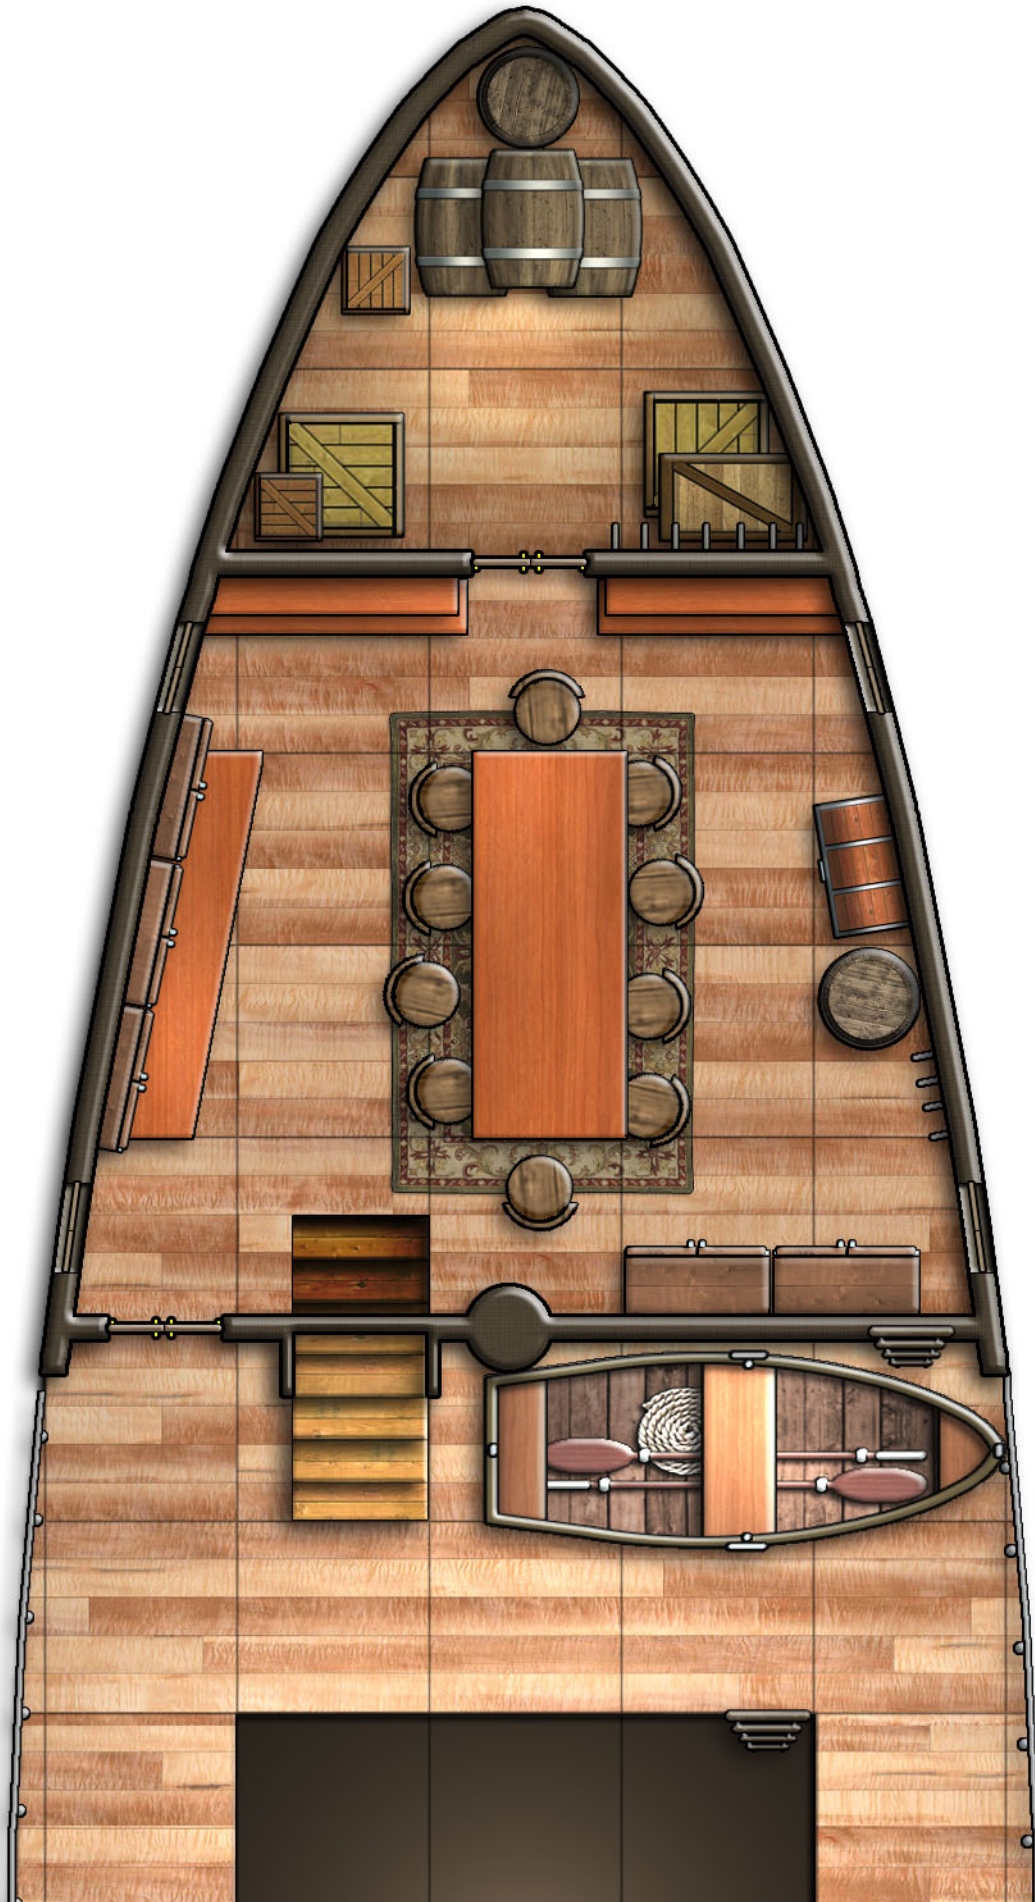

- **Page 3:** Main Book. This provides a brief description of the boats, followed by the maps broken into printable pages. The maps are at 1 inch = 5 feet scale with a grid built in. Composite maps are provided so it is easy to put the pieces together.
- **Page 4:** Printer Friendly Maps. Black-and-white versions of the map pages are also provided.
- **Page 5:** Sample Map. This is a single page from the main book, ready to be printed out and used with miniatures. The maps are designed to be laid end-to-end.
- **Page 6:** Summary. This is a copy of the online sales page (which you probably read before coming here).

The product also includes a poster-sized .jpeg image (24x36 inches at 150 dpi) for your use.

Thank you for taking the time to explore this product. I hope that it, and other *Ki Ryn Studios* offerings can be of service in your game.

## **Sailing Ships**

Set sail on the high seas with this installment of *Zero Hour* fantasy cartography. Presented for your use are three sizes of ship, each with a variant configuration. At 100 feet in length, the largest vessel is a three masted ship with either three or four decks. An optional overlay page is provided to add a gun deck with ten cannons.

The mid sized boat, at 50 feet, has two masts and comes in two and three deck versions. The smaller boat is 30 feet long and has a single mast. An open version and a version with a cabin are included. These medieval sailing ships are ready to drop into your game of choice and help bring your story to life.

This product includes the following:

- Full color, miniature-scale maps broken into pages for easy printing.
- Black and white, printer-friendly versions of the map pages.
- A 24x36 inch, 150 dpi, color JPEG image of the ship maps at 1 inch = 5 feet scale (sample image below).

Weigh anchor and set a course for adventure. When its time to play, *Zero Hour* cartography is ready!
