The purpose of this document is to show you what you can expect should you choose to invest in this issue of the 0-hr Armada Codex. This issue presents three smaller ships: the Sengdao transport, SVN Prospector, and Akela-class shuttle. Each is very different in form and function.

The product consists of a main book, map pages book, and uncut map images. Specifically, this is what is shown in this brief demo document:

- **Page 2 (left): Main Book.** An overview of the ships, components, and statistics is provided. The stats are generic descriptions and not from any particular game system. Each area of each vessel is enumerated and described. Rendered images are included throughout.
- **Page 2 (right): Map Book.** The map book provides tactical maps (1 inch = 5 ft.) for the interior areas of the ships. The pages are designed to be printed out and laid edge to edge. Layers are used so that certain map elements (like the grid, cargo, or the black and white version of the map) may be toggled on and off as desired.
- **Page 2 (right): Uncut Maps.** Complete deckplans are presented in a single giant image, layered so that the grid, black and white version, and so on can be toggled on or off. It includes a light background good for printing, and a dark background good for display on a computer or with a projector.
- **Page 3:** This is a sample page from the map book. The layers are live in this demo document.
- **Page 4:** Displayed here is a sample of some rendered art from the main book.
- **Page 5:** This is a copy of the product overview from the sales web page.

Thank you for taking the time to explore this product line. I hope that these ships can find a place in your fleet!

## 0-hr Armada Codex

# Sengdao 3

This issue of the Codex presents a trio of small ships that vary greatly in both style and intended use. All are perfect for a small group of starfarers just starting out or looking for a new ride.

Sengdao is a high-end transport, considered a yacht by some, originally created by the TerraNovan Theocracy to spread the Lux Aeternum throughout, and beyond, civilized space. Sleek and stylish, with five cabins and enough room to carry up to seven crew and passenger in comfort; she's well armed for a ship of her size and has space for some cargo as well.

The SNV Prospector is a working ship made to mine and transport metal ore. Industrial and rugged, this vessel epitomizes the "form follows function" design mentality. There's room for four crew but not a lot in the way of amenities. The SVN carries a pair of customized HMT-337 containers that can be swapped out for standard cargo boxes, passenger containers, or any of the other 337's from previous products.

Lastly, the Akela is a scaled-up Lokai-class shuttle with bunks for four or six. It's the smallest design of the three and doesn't have much more inside than the cockpit, main cabin, and bunk area. A passenger shuttle version is also included which has seating for 36 passengers plus their luggage.

The Sengdao 3 package contains three highly detailed, layered PDF files:

- Main Book
  - 28 page PDF file detailing the interior areas of the ships.
  - Contains 3D rendered scenes as well as orthographic views.
  - Includes system independent statistics designed for easy adaptation to your game of choice.
  - Background, art, and text are on different layers for custom display and printing.

- Map Pages
  - 20 page PDF file containing complete interior maps and instructions for assembly.
  - Miniature-scale maps for tactical combat with an optional 1 inch = 5 ft grid.
  - Divided into pages for easy printing in full color or printer-friendly black and white.
  - Selectable layers include: grid, black & white version, and optional cargo.

- Uncut Map Images
  - Four PDF files containing uncut images of the deckplans for the ships.
  - Includes the 24x24 inch Sengdao, 27x23 Prospector, and two 8x11 Akela, map images.
  - Select either a light or dark background (for printing or projection/display).
  - Includes layers for grid, black & white version, optional cargo, and background choice.
  - Flat jpeg images on a dark background are also provided for use on screen.

Sample document and art, as well as poster maps and matching miniatures, are available at **0-hr.com**.

Thank you for taking the time to consider the Sengdao, Prospector, and Akela-class starships. I hope that these three small craft can be a big addition to your game!
